PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience designing and delivering scalable, secure, web applications using React, Spring Boot, Java, and MySQL. Expertise in REST API development, UI performance optimization, and Agile methodologies. Demonstrated success in reducing system bugs, improving page load times, and accelerating development cycles through reusable component libraries. Strong technical communicator skilled in cross functional collaboration and delivering cloud-ready, maintainable solutions.

CORE COMPETENCIES

Frontend Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design, UI/UX Optimization.

Backend Technologies: Java, Spring Boot, Spring MVC, Microservices Architecture, Hibernate, JPA, REST APIs, API Design.

Databases: MySQL, Oracle, Query Optimization, Schema Design.

DevOps & Tools: Git, GitHub, Maven, Jenkins, Docker, Kubernetes, CI/CD Pipelines, SonarQube, ELK Stack.

Testing & Quality: JUnit, Mockito, Unit Testing, API Testing, JMeter, Debugging, Code Reviews.

Methodologies: Agile-Scrum, SDLC, Test-Driven Development, Continuous Integration/Deployment.

Professional Skills: Technical Leadership, Cross-Functional Collaboration, Problem-Solving.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

Oct 2024 – Present

AbhyaasIndia

Hyderabad, India

- Architected scalable CRM modules using React, Spring Boot, and MySQL and improving operational workflow efficiency.
- Designed REST APIs enabling secure and optimized data communication across platform components.
- Optimized MySQL database schema and complex SQL queries through indexing and normalization, achieving improvement in data retrieval speed and reducing server load.
- Improved UI performance via component refactoring and lazy loading, reducing load time and improving user engagement metrics.
- Collaborated on requirements, reviews, and performance optimization, ensuring clean and scalable deliveries.
- Reduced recurring production bugs through comprehensive debugging, root cause analysis, and implementation of automated unit tests with JUnit and Mockito.
- Collaborated with product managers and stakeholders in Agile sprints to gather requirements, define user stories, and deliver features.

Web Developer

Jul 2021 – Oct 2024

OMICS International Pvt. Ltd.

Hyderabad, India

- Designed and maintained 50+ responsive journal web interfaces using React and JavaScript.
- Improved website performance through image optimization, lazy loading, and refactored UI architecture, enhancing SEO rankings.
- Developed reusable React component library with 30+ modular components, reducing new page development time and ensuring consistent UI/UX across platform.
- Collaborated with cross-functional teams including content managers, designers, and QA engineers to streamline publishing workflows and accelerate feature deployment cycles.

- Integrated REST APIs for dynamic content delivery, enabling real-time updates and reducing manual content management efforts.

Assistant Managing Editor
OMICS International Pvt. Ltd.

Sep 2019 – Jul 2021
Hyderabad, India

- Managed end-to-end editorial workflows for 200+ journal publications, improving timeline consistency and ensuring content accuracy through rigorous quality controls.
- Designed and implemented standardized communication templates and automated email workflows, reducing editorial processing time and improving response rates
- Coordinated with international network of authors, reviewers, and editorial board members to maintain publication quality standards.

TECHNICAL PROJECTS

WisperTalk - Secure Messaging Application

React, Spring Boot, JPA, MySQL

- Built end-to-end encrypted messaging platform with AES-256 encryption, supporting real-time text exchange for 1,000+ concurrent users.
- Developed RESTful API infrastructure with Spring Boot and integrated React frontend using Axios for seamless client-server communication.
- Implemented JWT-based authentication and authorization system, ensuring secure user sessions and data privacy compliance.

Ping Mate - Real-Time Chat Application

React, Firebase, Firestore

- Created real-time messaging application with Firebase Authentication and Firestore database.
- Designed responsive UI with Material Design principles, supporting daily active users with seamless mobile experience.

Aurora Cast - Weather Forecast System

React, Weather API Integration

- Integrated third-party OpenWeatherMap API with React frontend, providing 7-day weather forecasts with hourly updates.
- Implemented dynamic UI with real-time data visualization improving user engagement.
- Optimized API call frequency through caching strategy, reducing external API costs.

Travel Nest - Ticket Generation System

React, jsPDF

- Developed automated PDF ticket generation system and booking confirmations for travel bookings.
- Implemented comprehensive form validation using custom React hooks, reducing user input errors.
- Created reusable component architecture, enabling rapid feature additions and reducing development time.

EDUCATION

Bachelor of Technology in Mechanical Engineering
Sai Ganapathi Engineering College

2013 – 2017
Visakhapatnam, India

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Generative AI Workshops - GPT-4o, Claude 3, Gemini 1.5, Cursor, OpenRouter, 11Eleven Labs
- Agile Fundamentals - Scrum Alliance
- Full Stack Web Development Bootcamp - React and Java Specialization
